

Confirmation of Greenhouse Gas Emission Reductions

This is to certify that, on behalf of Georg Fischer Machining Solutions, we have carried out a Greenhouse Gas (GHG) analysis, with partial funding from the Swiss Federal Office of Energy (BfE), for the Swiss production sites of:

- + Biel/Bienne (Roger-Federer-Allee 7)
- + Langnau im Emmental (Kanalweg 4)

The following observations applying to Scope 1 and Scope 2 emissions were made:

Biel/Bienne

Emissions have been reduced by **98.5%** from a value of 1,680 tCO₂e/a in 2020. Currently, 24 tCO₂e/a are emitted from the site. These can be compensated through the acquisition of certificates.

Langnau im Emmental

Emissions have been reduced by **89.8%** from a value of 187 tCO₂e/a in 2020. Currently, 19 tCO₂e/a are emitted from the site. These can be compensated through the acquisition of certificates.
